### Angola signs MoU for green hydrogen development

 Angola

**LUANDA, November 15, 2021** – Angola’s Sonangol has signed an MoU with Germany’s Gauff & Company Engineering to build a green hydrogen facility, the state-run oil and gas operator announced at Africa Energy Week.

Director of Renewables Paulo Guedes who spoke at Africa Energy week said that key stakeholders, location, costs and market opportunities had not yet been identified.

Angola’s NOC has developed a portfolio of solar energy developments, including projects with Eni and TotalEnergies, with the aim of producing 385 MW of solar power by 2027.
